

## About Us

We offer a full range of dental treatment from preventative care to emergency appointments. We encourage children to visit us from an early age to get used to visiting the dentist and to avoid dental problems developing.

X-rays are necessary for the diagnosis of tooth and gum disease and are always undertaken within the Practice. X-rays can determine the presence of hidden decay and impacted teeth, the condition of deep fillings, and many other problems.

We are able to offer cosmetic dentistry on a private basis. Please discuss this with us if you are interested.
