

# Tooth Coloured Fillings

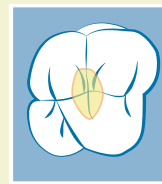

Corfe Mullen  
Dental Surgery

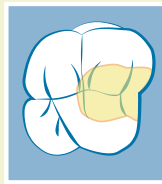

**NHS dentistry can only provide the treatment that is necessary to protect and maintain the health of your mouth, teeth and gums. Cosmetic treatments (such as tooth coloured fillings) are not normally available under NHS care, unless it is clinically appropriate.**

If you are an NHS patient, you can still benefit from our full range of treatment options and keep your natural smile. All you need to do is pay for your treatment privately in addition to your normal NHS charges. Should you need a filling, your dentist will discuss the benefits, suitability and costs of all the treatment options available, so you can choose the one that is right for you. A tooth coloured filling may not be a viable option where the additional durability of a silver coloured (amalgam) filling is required. If you already have amalgam fillings, please note that it is usually recommended that you change fillings only when your dentist decides that an old filling needs replacing. However, if this is the case, then you can ask to have it replaced in a tooth coloured material.

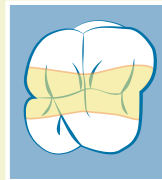

## Tooth Coloured Filling Price Guide

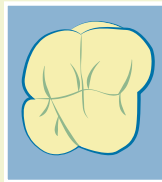

Small premolar/molar
